LIEBHERR

BARRIQUE WINE STORAGE FRIDGE, 168 BOTTLES (LED LIGHTING) ~ WKGB 4113

For customized pricing on project or volume quantity purchases, please do not hesitate to contact us via whatsapp button below.

FEATURES :

- Low-vibration storage

Even slight vibrations can disturb the wine maturing process and prevent the tannins from settling. Specially developed, exceptionally low-vibration compressors in all the wine cabinets mean that the wine is optimally stored.

- Ideal humidity

Maintaining the proper humidity is an important aspect for the storage of wines. In this way, corks remain supple and do not dry out. Wine should be stored in a horizontal position to keep the corks moist from the inside. With over 50 % air humidity, wine cabinets guarantee the perfect conditions. The air humidity can be controlled as required in the wine storage cabinets by pressing the ventilation button.

LIEBHERR SINGLE GLASS DOOR UPRIGHT DISPLAY FREEZER WITH LED LIGHT, NO CANOPY - OPTION OF 3613 & 3643~ FV SERIES

For customized pricing on project or volume quantity purchases, please do not hesitate to contact us via whatsapp button below.

FEATURES:

Forced air cooling

Highly efficient fans cool freshly stored produce quickly and maintain an even refrigeration temperature throughout the interior.

Efficient refrigeration system

Liebherr guarantees the outstanding quality of its refrigeration systems through expertise derived from decades of experience in the refrigeration technology sector, and through continuous research and development. By employing only premium-quality compressors, condensers, evaporators and other refrigeration components the energy consumption and operating costs of Liebherr appliances are significantly reduced.

Height-adjustable feet

In locations where daily hygiene is imperative, the height-adjustable levelling feet offer generous floor clearance and ensure that cleaning under the appliance can be easily and conveniently performed.

NoFrost technology

No need to defrost: Liebherr's NoFrost technology provides outstanding freezing performance for professional-standard, long-term freshness. To ensure that the freezer always remains ice-free and that food does not frost over, food is frozen using circulating chilled air and any moisture is removed.

Temperature alarm

The integrated temperature alarm indicates if the lower or upper alarm thresholds have been breached. It uses both acoustic and visual signals to provide maximum security for goods that have been stored.

Environmentally friendly refrigerants

Liebherr appliances are optimised for maximum energy efficiency and low operating costs. We only use the natural and environmentally-friendly refrigerants R 600a and R 290. When used with highly efficient compressors, these are extraordinarily efficient and, with their low global warming potential, also future-proof.

High impact product presentation

The energy-saving LED interior lighting provides the ideal presentation of the products stored

LIEBHERR CHEST FREEZER, STAINLESS STEEL LIFT TOP - EFL SS.LL05 - OPTION : 256L, 387L, 520L

For customized pricing on project or volume quantity purchases, please do not hesitate to contact us @ <https://bit.ly/3cASqVP>

FEATURES :

- Premium-quality lid seal : Uniform closure of the freezer is guaranteed thanks to the flexible lid seal. It prevents cold air escaping from the appliance and so enhances its energy efficiency. The seal is made from a highly resilient, long-lasting material and its performance is unaffected by temperature fluctuations. It is easy to clean and extremely hygienic.
- Efficient refrigeration system : Liebherr guarantees the outstanding quality of its refrigeration systems through expertise derived from decades of experience in the refrigeration technology sector, and through continuous research and development. By employing only premium-quality compressors, condensers, evaporators and other refrigeration components the energy consumption and operating costs of Liebherr appliances are significantly reduced.
- Environmentally friendly refrigerants : Liebherr appliances are optimised for maximum energy efficiency and low operating costs. We only use the natural and environmentally-friendly refrigerants R 600a and R 290. When used with highly efficient compressors, these are extraordinarily efficient and, with their low global warming potential, also future-proof

LIEBHERR CHEST FREEZER, CURVED GLASS, WITH LED LIGHT (ONLY ON PREORDER BASIS FOR LED SERIES) - EFI SERIES

For customized pricing on project or volume quantity purchases, please do not hesitate to contact us @ <https://bit.ly/3cASqVP>

FEATURES :

- Suspension baskets : The suspension baskets allow goods to be organised with ease and clearly presented for optimum effect. Horizontal LED lighting optimally illuminates the products for attractive presentation.
- Tempered single-pane safety glass : The single-pane safety glass is made from a single, thermally-treated and tempered pane that is highly resistant to wear, impact and temperature fluctuations.
- Efficient refrigeration system : Liebherr guarantees the outstanding quality of its refrigeration systems through expertise derived from decades of experience in the refrigeration technology sector, and through continuous research and development. By employing only premium-quality compressors, condensers, evaporators and other refrigeration components the energy consumption and operating costs of Liebherr appliances are significantly reduced.
- Flat Sliding glass lids : The sliding glass lids provide a clear view of the products stored, presenting them in a highly effective, sales promoting manner. They are made from tempered single-pane safety glass and are therefore extremely impact resistant.
- Environmentally friendly refrigerants : Liebherr appliances are optimised for maximum energy efficiency and low operating costs. We only use the natural and environmentally-friendly refrigerants R 600a and R 290.
